

## **PBL (PROJECT-BASED LEARNING)**

Project based learning is a key element of the learning experience at SIS for the following reasons;

- It appeals to multiple intelligence
- It develops soft skills in participants
- It encourages critical thinking
- It fosters a sense of plan-do and review
- It's fun and 'breaks up' the traditional learning experience
- It is useful in the marketing of the school

Staff need to consider;

- Being responsible for devising appropriate ideas that ensure a breadth of project type across all subjects within a year group
- The planning of the project, ensuring that students are part of the process, using the appropriate planning tools and saving these documents on the network for future years
- The monitoring of progress to ensure that valuable curriculum time is not wasted and that staff and student deadlines are met
- That all students learn from the process
- That students are supported to produce quality work
- That work is saved within a pupil project file in a variety of media once reviewed
- That the projects are appropriately assessed and there is feedback for both students and parents alike
- That projects are displayed around the school wherever possible
